Cintra Junior Finance Analyst Program
Austin, TX

Dear Hiring Committee,

I am applying for the Junior Finance Analyst position at Cintra in Austin, Texas. I am a senior at the Darla Moore School of Business at the University of South Carolina, majoring in Finance and Risk Management with a 3.9 GPA. My academic foundation and professional experiences have prepared me to approach complex financial data with precision and to evaluate business outcomes through the lens of risk management and analytical rigor.

This past summer, I interned in Capital Markets at BNP Paribas, where I worked on projects across the Sales & Trading division. I was responsible for building analytical models and preparing performance reports that required attention to market risk, pricing accuracy, and data validation. One of my most meaningful experiences involved designing a volatility analysis for a structured product that highlighted how data inconsistencies can impact client deliverables. Through this, I developed a stronger understanding of data integrity, risk assessment, and the importance of precise reporting—skills that directly align with Cintra's focus on financial accuracy, audit support, and process improvement.

Beyond my internship, I have honed my analytical and technical skills through the Carolina Finance Scholars Program, a selective academic cohort where I've applied advanced Excel modeling, valuation, and scenario analysis to real-world financial problems. These projects, along with my coursework in risk management, have given me experience interpreting data trends, building sensitivity analyses, and understanding how operational risks can materialize financially. I enjoy solving problems through data and look forward to contributing in a dynamic, cross-functional environment like Cintra's finance team.

I am drawn to Cintra's commitment to innovation and infrastructure excellence. As part of a globally recognized and publicly traded company listed on multiple major exchanges, Cintra's scale and reputation reflect a standard of excellence that I look forward to learning from. The opportunity to contribute to risk assessment, budgeting, and audit coordination for large-scale projects aligns perfectly with my interests in analytical finance and operational efficiency. I would welcome the chance to contribute to Cintra's financial reporting initiatives while continuing to grow in a role that combines collaboration, precision, and impact.

Thank you for your time and consideration. I would appreciate the opportunity to further discuss how my analytical background and attention to financial risk can support Cintra's objectives.

Sincerely,

Leo Goldberg
