Blue Owl Capital
Structured Credit Analyst
New York, NY

Dear Hiring Committee,

I am writing to apply for the Structured Credit Analyst role at Blue Owl Capital. I am a Finance and Risk Management student at the University of South Carolina and recently completed internships at BNP Paribas and Forte Capital Group, where my work focused on structured products, downside risk analysis, and portfolio outcomes.

At BNP Paribas, I worked on the structured products side within Global Markets, analyzing structured note payoffs linked to a defined-volatility index. My focus was on evaluating return scenarios, downside protection, and how structured instruments behave under stress. This experience trained me to think in terms of cash-flow behavior, payoff decomposition, and disciplined risk assessment rather than short-term market moves.

Previously, at Forte Capital Group, I supported investment analysis and prepared suitability-focused materials for high-net-worth clients. That role reinforced the importance of aligning investment decisions with client objectives, risk tolerance, and long-term portfolio considerations, which is directly relevant to insurance-oriented asset management.

I am particularly interested in structured credit within an insurance context because of the emphasis on underwriting discipline, surveillance, and long-term capital preservation. I am eager to build deeper experience in CLOs and structured credit products while contributing strong analytical rigor, attention to detail, and a willingness to learn in a team-oriented environment.

Thank you for your time and consideration. I would welcome the opportunity to further discuss my interest in the role.

Sincerely,
Leo Goldberg
